2552
DC Voltage Standard

The 2552 is a programmable DC voltage standard which delivers an output voltage of 0 to $\pm 1,200 \mathrm{~V} \mathrm{DC}$ at an accuracy of $\pm 0.005 \%$. The output is controlled by a reflected binary code (Gray code) signal so that an undesired output is virtually impossible.
$\pm \mathbf{~} \quad \mathbf{0 . 0 0 5} \%$ accuracy

- 0 to $\pm 1,200 \mathrm{~V}$ DC in 4 ranges
- Patented PWM DC Potentiometer featuring outstanding stability and long-life operation
- Voltage trip and current limiter
- Remote programming or BCD output option
- Output polarity switch-selectable

## SPECIFICATIONS

## Voltage Ranges:

| Range | Output Voltage | Steps |
| :---: | :---: | :---: |
| $1,000 \mathrm{mV}$ | 0 to $\pm 1,199.999 \mathrm{mV}$ | $1 \mu \mathrm{~V}$ |
| 10 V | 0 to $\pm 11.99999 \mathrm{~V}$ | $10 \mu \mathrm{~V}$ |
| 100 V | 0 to $\pm 119.9999 \mathrm{~V}$ | $100 \mu \mathrm{~V}$ |
| $1,000 \mathrm{~V}$ | 0 to $\pm 1,199.999 \mathrm{~V}$ | 1 mV |

Max. Output Current: Approx. 25 mA on $1,000 \mathrm{mV} / 10 \mathrm{~V} / 100 \mathrm{~V}$ ranges, 10 mA on $1,000 \mathrm{~V}$ range
Accuracy of Output: (at 3-month calibration cycle, $23 \pm 2^{\circ} \mathrm{C}$, relative humidity of 45 to $75 \%$, rated power supply voltage and rated load) $1,000 \mathrm{mV}$ range (whichever is greater)
$\pm 0.005 \%$ of setting or $\pm 10 \mu \mathrm{~V}$
10 V range (whichever is greater) $\pm 0.005 \%$ of setting or $\pm 50 \mu \mathrm{~V}$
100 V range (whichever is greater) $\pm 0.005 \%$ of setting or $\pm 500 \mu \mathrm{~V}$
$1,000 \mathrm{~V}$ range (whichever is greater) $\pm 0.005 \%$ of setting or $\pm 5 \mathrm{mV}$
Temperature Coefficient of Output: (at 5 to $21^{\circ} \mathrm{C}$ or 25 to $40^{\circ} \mathrm{C}$ ) $\pm(0.0005 \%$ of setting $+1 \mu \mathrm{~V}) /{ }^{\circ} \mathrm{C}$ on $1,000 \mathrm{mV}$ range
Stability of Output: (after 4 hours of OUTPUT ON, at the same conditions in Accuracy of Output)
$1,000 \mathrm{mV}$ range (whichever is greater) $( \pm 0.0005 \%$ of setting or $\pm 2 \mu \mathrm{~V}) /$ hour
$( \pm 0.001 \%$ of setting or $\pm 3 \mu \mathrm{~V}) / 24$ hours $( \pm 0.002 \%$ of setting or $\pm 5 \mu \mathrm{~V}) / 30$ days
10 V range (whichever is greater) $( \pm 0.0005 \%$ of setting or $\pm 20 \mu \mathrm{~V}) /$ hour $( \pm 0.001 \%$ of setting or $\pm 20 \mu \mathrm{~V}) / 24$ hours $( \pm 0.002 \%$ of setting or $\pm 30 \mu \mathrm{~V}) / 30$ days
Ripple and Noise: (at rated output voltage and rated load)

| Range | DC to $\mathbf{1 0 H z}$ | $\mathbf{1 0 H z}$ to $\mathbf{2 M H z}$ |
| :---: | :---: | :---: |
| $1,000 \mathrm{mV}$ | $5 \mu \mathrm{Vrms}$ | $100 \mu \mathrm{Vrms}$ |
| 10 V | $10 \mu \mathrm{Vrms}$ | $200 \mu \mathrm{Vrms}$ |
| 100 V | $70 \mu \mathrm{Vrms}$ | $500 \mu \mathrm{Vrms}$ |
| $1,000 \mathrm{~V}$ | $500 \mu \mathrm{Vrms}$ | 2 mVrms |

Settling Time: (time for attaining a value within $\pm 0.005 \%$ of final output after change of range or set value, not including polarity change)
500 ms on $1,000 \mathrm{mV} / 10 \mathrm{~V} / 100 \mathrm{~V}$ ranges, 3 s on $1,000 \mathrm{~V}$ range
Line Regulation: (against a power line voltage variation of $\pm 10 \%$ of rated value)
$\pm(0.0005 \%$ of setting $+0.0002 \%$ of range)
Load Regulation: (against a change from no load to full load) $\pm(0.0005 \%$ of setting $+0.0002 \%$ of range $)$
Overcurrent Protection (Current Limit): Automatically limits output current at the preset level from 1 mA to 25 mA in 4 steps according to set limit dial on front panel
Overvoltage Protection (Voltage Trip): Automatically sets output voltage to zero at the preset level from 12 V to $1,200 \mathrm{~V}$ in 4 steps, output termainals are shorted, and output voltage is turned on again only when output dial is set to STAND BY and OUTPUT ON
Polarity Selection: + , or 0 (output termainals short-circuited)
Operating Temperature Range: 5 to $40^{\circ} \mathrm{C}\left(41\right.$ to $\left.104^{\circ} \mathrm{F}\right)$
Humidity Range: 20 to $80 \%$ (relative humidity)
Warm-Up Time: (Time for attaining a value within specified accuracy), Approx. one hour
Insulation Resistance: More than $500 \mathrm{M} \Omega$ at 500 V DC between the case and power line, guard and case, and guard and chassis
Dielectric Strength: $1,500 \mathrm{~V}$ rms ( 50 Hz ) for one minute between the case and power line, $3,500 \mathrm{~V}$ rms $(50 \mathrm{~Hz})$ for one minute between guard and case and between guard and chassis
Power Requirements: $100,115,200,215$, or 230 V AC (must be specified), 50 and 60 Hz
Power Consumption: Approx. 80 VA at full load
Available Models: 255211 Standard, 255212 with remote control, 255213 with BCD ouput
Remote Control: Provided with 255212. Output voltage, range, polarity, voltage trip, current limit, and standby-operate settings are programmable by external contact or TTL level signals.
