

# Fluke 500 Series Battery Analyzers

Intelligent test probe with integrated LCD display

**Reduced testing complexity, a simplified workflow and an intuitive user interface provide a new level of ease-of-use in battery testing.**

The new Fluke 500 Series Battery Analyzer is ideal test tool for maintenance, troubleshooting and performance testing of individual stationary batteries and battery banks used in critical battery back-up applications. The intuitive user interface, compact design and rugged construction ensure optimum performance, test results and reliability. Fluke 500 Series Battery Analyzers cover a broad range of battery test functions ranging from DC voltage and resistance tests to full condition testing using an automated string function testing and the test probe integrated infra-red temperature measurement system. 500 Series Battery Analyzers are designed for measurements on stationary batteries of all types.

## Technical Data

- **Key measurements:** Battery resistance, dc and ac voltage, dc and ac current, ripple voltage, frequency and battery temperature.
- **Sequence measurement mode:** Automatic or manual sequence testing of battery strings with automatic measurement storage including voltage, resistance and temperature (with BTL21 intelligent test probe).
- **Comprehensive logging:** All measured values are automatically captured during testing and can be reviewed on the instrument before downloading.
- **Optimized user interface:** Quick, guided setup ensures you're capturing the right data every time, and the combined visual and audio feedback cues reduce the risk of measurement confusion.
- **Threshold comparison:** Configure multiple reference values and thresholds for resistance and voltage. Comparison result feedback after each measurement via visual and verbal cues.
- **Ergonomic test leads:** Rugged coaxial two pole kelvin test pins with remote SAVE button reduce test time and increase efficiency.
- **NEW! Intercell strap resistance test and data management:** Measures the resistance of the intercell connection between batteries in a string. Once the measurements are completed Fluke Battery Management Software version 1.0.69 can now report the strap resistance for a battery string or historical data over time.
- **Test probe extenders:** Long reach probes for double stacked cells.
- **Intelligent test probe set (BT520 and BT521):** Integrated LCD display, infrared temperature measurement (BT521 only), verbal audio feedback and captures voltage readings and temperature logging automatically or via integrated save button.
- **Enhanced data analysis:** Quickly compare trends, analyze results and create reports with included battery management software.
- **Easy reporting:** Generate PDF report on the PC software with analysis graphics and data table or quick email format report with csv file on the mobile app.
- **Wireless communication:** For data download and remote display while measuring. Browse and email measurement data via iOS app.
- **Battery life:** 7.4 V 3000 mAh lithium-ion battery for more than eight hours continuous operation.
- **USB port:** For fast data download to supplied data analysis and report management application software.
- **Highest safety rating in the industry:** CAT III 600 V, 1000 V dc max. rated for safe measurements all around the battery power supply equipment.

## Voltage and resistance thresholds

Fluke Battery Analyzers allow you to quickly and easily define upper and lower measurement thresholds or tolerance ranges. During the testing process, measured values are automatically compared to the predefined threshold levels producing a PASS, FAIL or WARN indication after each measurement. A maximum of 10 sets

of thresholds can be stored and threshold indications are determined based on the following criterion:

Voltage		Resistance		
>Voltage Lower	<Voltage Lower	<Reference	>Reference and < Reference x (1+Warning %)	>Reference x (1+Fail)
Pass	Fail	Pass	Warning	Fail

## Fluke Battery Management software

Fluke Battery Management Software allows you to quickly and easily import data from the battery analyzer to a PC. The measurement data and battery profile information is stored and archived with the Management Software and can be used compare results, switch results between conductance and resistance (requires Software Management software version 1.0.69 or later) readings and perform trend analysis. All measurement data, battery profile and analysis information can be used to easily generate reports.

- Quick view saved readings
- Profile management
- Histogram of a battery string with end user defined threshold
- Historical trend data of batteries
- Multiple rounds of discharge voltage
- Quick Report Generation
- Upgrade Fluke Battery Analyzer firmware
- Switch measurement results between conductance and resistance readings

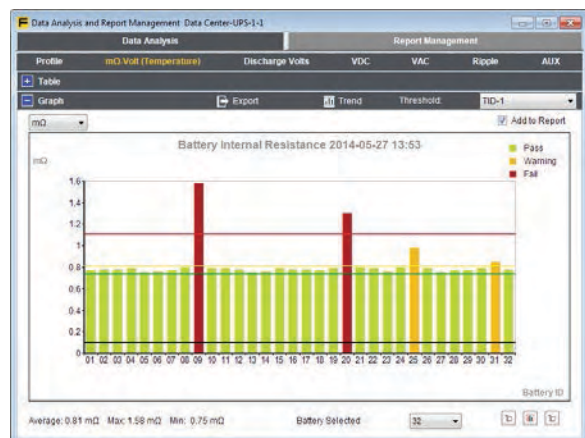

Historical trend data of batteries.

## Fluke Battery Analyze mobile app

The BT521 offers wireless communication for data download and remote display while measuring via the dedicated Fluke Battery Analyzer mobile app. Using the Fluke Battery Analyze mobile app you can:

- Browse profile
- Review sequence testing data
- E-mail sequence testing data

## General specifications

<b>Size (HxWxD)</b>	22 cm x 10.3 cm x 5.8 cm (9 in x 4 in x 2 in)
<b>Weight</b>	850 g (1.9 lb)
<b>Screen dimensions</b>	7.7 cm x 5.6 cm (3 in x 2.2 in)
<b>Interface</b>	USB mini

## Environment specifications

<b>Operating temperature</b>	0 °C to 40 °C
<b>Storage temperature</b>	-20 °C to 50 °C
<b>Lithium-ion battery charging temperature</b>	0 °C to 40 °C
<b>Operating humidity</b>	Non-condensing (10 °C)
	<=80 % RH (at 10 °C to 30 °C)
	<=75 % RH (at 30 °C to 40 °C)
<b>Operating altitude</b>	Sea level to 2000 meters
<b>Storage altitude</b>	Sea level to 12,000 meters
<b>IP rating</b>	IP40
<b>Radio</b>	FCC Class A
<b>Vibration requirements</b>	MIL-PRF-28800F: Class 2
<b>Drop test requirements</b>	1 meter
<b>Temperature coefficients</b>	Add 0.1 x specified accuracy for each degree C above 28 °C or below 18 °C
<b>Safety compliance</b>	600 V CAT III
<b>EMC</b>	IEC 61326
<b>ROHS</b>	China, Europe
<b>Protection Class 2</b>	Pollution Degree II
<b>Battery compliance</b>	UN38.3
	UL2054
	IEC62133
	2G per IEC68-2-26, 25G, and 29

## Ordering Information

**Fluke BT510** Basic Battery Analyzer  
**Fluke BT520** Battery Analyzer  
**Fluke BT521** Advanced Battery Analyzer

### Accessories

**BTL10** Basic Battery Analyzer Test Leads  
**BTL20** Interactive Battery Analyzer Test Probe  
**BTL21** Interactive Battery Analyzer Test Probe with temperature sensor

**BTL-A** Voltage/Current Probe Adapter  
**C500S** Soft carrying case (small)  
**C500L** Soft carrying case (large)  
**BC500** AC Power Charger  
**BP500** Lithium-ion battery 3000 mAh  
**TPAK80-4** Magnetic Strap  
**B4WTP** 4-wire test pin  
**i410** AC/DC Current Clamp  
**BCR** Zero ohm calibration resistor

## Items supplied with each model

Equipment	Qty.	BT510	BT520	BT521
Battery analyzer	1	•	•	•
4-wire test pin (set)	1	•	•	•
BTL10 Basic Test Lead (set)	1	•	•	•
TL175 TwistGuard™ Test Leads with adapter	1	•	•	•
BTL20 Intelligent Test Probe Set, with extender (no temperature sensor)	1		•	
BTL21 Intelligent Test Probe set, with extender and temperature sensor	1			•
