

Hipotronics KV200A

AC/DC Kilovoltmeter

Engineered for safety and precision, the KV200A has one hand portability plus safe storage for the AC/DC dividers behind the front panel. The triple range voltmeter guarantees 1.0% accuracy. Surege devices prevent damage to components or injury to the operator even when short circuits occur at full voltage.

Measures DC, Ripple voltage-AC superimposed on DC, AC Peak, AC RMS-true value, and AC Absolute average

High range: 0-199.9 KV

Low Range: 0-19.99 KV

Accuracy:

- DC 0.5%
- RMS Average 1.0%
- Peak 2.0%

Impedance: 1 Mohn, level=100 VFS

Other features:

Low temperature and voltage coefficients

Analog readout

AC and DC coupling
