VIS 300

Visual Inspection Scope

Field Scope for Fiber Endfaces

The VIS 300 advances field connector inspection with its unique focus system. This development virtually eliminates the need to place the user's hand in the same position each time for effective focus control. To focus simply turn the entire probe ¼ to ½ turns for complete focus range. No longer is it necessary for the user to keep one hand on the focus wheel.

The VIS 300 includes a bright 3.5 inch LCD display and precision optics to provide a wide field of view (FOV) of 630µm by 440µm. Users can perform simple field inspection on the LCD screen or connect the VIS 300 to a computer via USB. Miller's inSpec® software for Windows allows users to inspect, grade, and save fiber endface images streamed from the VIS 300.

The VIS 300 comes with two user-selected adapter tips. Optional tips for most commonly used connectors are available. The VIS 300 monitor is supplied in a padded nylon case. Both the probe and monitor are transported in a hard carry case with the charger, extra tips, and cleaning tools.

Features

- Unique external focus mechanism
- 630µm x 440µm field of view (FOV)
- Advanced Lithium Ion battery and smart AC charger system
- Quick-change adapter tips for all connector styles
- 3.5-inch LCD display

Large field-of-view (FOV) - see more of the connector endface to ensure perfect fiber connections every time.

Connect VIS 300 to a computer running ODM's free software to save images for closeout reports (USB model only).

Interchangeable adapter tips provide inspection of many different connector types.

VIS 300 unit comes with 2 standard inspection tips and cleaning kit in a hard carry case.
